

PERIPrem Bundles by Gestational Age & Ventilation

28 weeks and less:	30 weeks and less:	32 weeks and less:	34 weeks and less:
<p><i>Place of Birth</i></p> <p><i>Less than 27 weeks for singletons and estimated fetal weight of below 800 grams</i></p> <p><i>Less than 28 weeks for multiples</i></p> <p><i>Prophylactic Hydrocortisone (for VG ventilation)</i></p>	<p><i>Magnesium Sulphate</i></p> <p><i>Caffeine (consider up to 32/34 weeks)</i></p>	<p><i>Probiotics</i></p>	<p><i>Antenatal Steroids</i></p> <p><i>Early Maternal Breast milk</i></p> <p><i>Deferred Cord Clamping</i></p> <p><i>Normothermia</i></p> <p><i>VG</i></p>

The target is for 70% of all babies to have all of the bundle elements for which they are eligible. Therefore example interventions by gestational age and clinical criteria are as follows:

Clinical criteria	PERIPrem Bundle elements
<28w ventilated	All elements
<28w not ventilated	Excludes VG ventilation
28+0 to 29+6 ventilated	Excludes prophylactic hydrocortisone
28+0 to 29+6 not ventilated	Excludes VG ventilation & prophylactic hydrocortisone
30+0 – 31+6 ventilated	Excludes prophylactic hydrocortisone & Magnesium Sulphate
30+0 – 31+6 not ventilated	Excludes VG ventilation, prophylactic hydrocortisone & Magnesium sulphate
32+0 – 33+6 ventilated	Excludes prophylactic hydrocortisone, Magnesium sulphate, probiotics & caffeine
32+0 – 33+6 not ventilated	Excludes VG ventilation, prophylactic hydrocortisone, magnesium sulphate, probiotics & caffeine
