

PreciSSlon

Preventing Surgical Site Infection across a Region

We're delighted to celebrate these amazing results from the project...

Great Western Hospitals NHS Foundation Trust

Reduction of 30 day surgical site infection after elective colorectal surgery

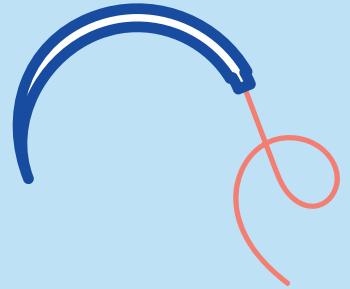

Compliance with the PreciSSlon bundle elements at GWH:

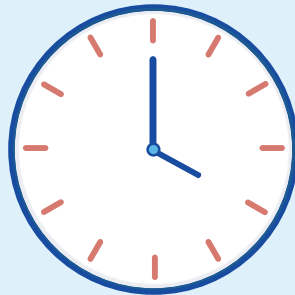

80%
Chlorhexidine

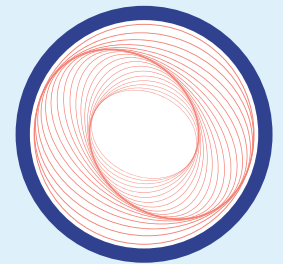

86%
Antibacterial sutures

100%
Second dose antibiotics after 4 hours

86%
Wound protectors

Figures from 220 patients

Thank you for all your help in making PreciSSlon such a success!
