

# FREE online training for all care staff

The West of England Academic Health Science Network is offering FREE RESTORE2 online training to spot when someone is unwell or getting worse.

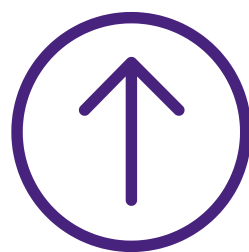

The training will support you to:

Recognise when a resident is unwell and at risk of getting worse (soft signs)

Prioritise who needs to be seen quickly (NEWS2 and ReSPECT)

Tell your concerns to the appropriate healthcare professional (SBARD)

"Staff using RESTORE2 have been far more prepared when going to visit a patient who is unwell."

"I feel like I know what the GP is going to ask, so I have the information there ready."

To book a place on the FREE training please visit:
