

Preterm Labour? Think Transfer

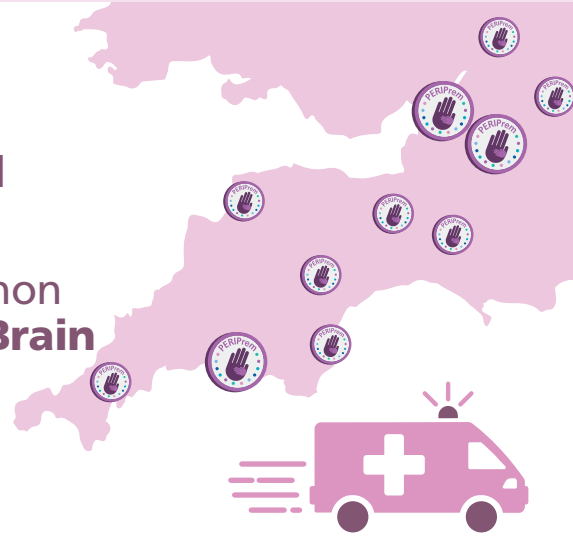

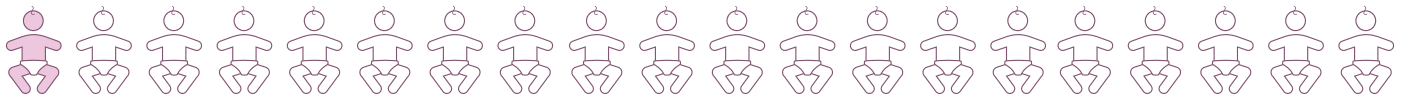

Did you know?

Babies below **27 WEEKS**, under **800g** and twins or multiples below **28 WEEKS** should be born in a tertiary unit

Extremely preterm babies (<28wks) born in a non NICU centre have a **2-3x** higher risk of **Severe Brain Injury** than babies born in the right place
NNT 8*

Babies are **1.3 times** more likely to die if they are born in a non NICU centre even if they are then transferred
NNT 20*

Think

Risk factors for preterm labour?

Need to communicate with a tertiary unit for advice?

Consider transferring?
