

Implementing FeNO testing in primary care – Bristol, North Somerset and South Gloucestershire Respiratory Champion project evaluation

Four PCNs in Bristol, North Somerset and South Gloucestershire were allocated funding from South West Respiratory Network to implement FeNO testing. A respiratory champion based in each PCN led on this work across their practices.

The project took place between February 2022 and March 2023.

15 practices
offering FeNO
testing

Virtual FeNO testing
Community of
Practice established

599 patients
reviewed

100% of staff feel FeNO
testing has supported
their diagnosing (9
survey respondents)

86 patients
diagnosed with
asthma

67% of patients feel
more able to manage
their symptoms (12
survey respondents)
