

Preterm Labour? Accepting Transfers

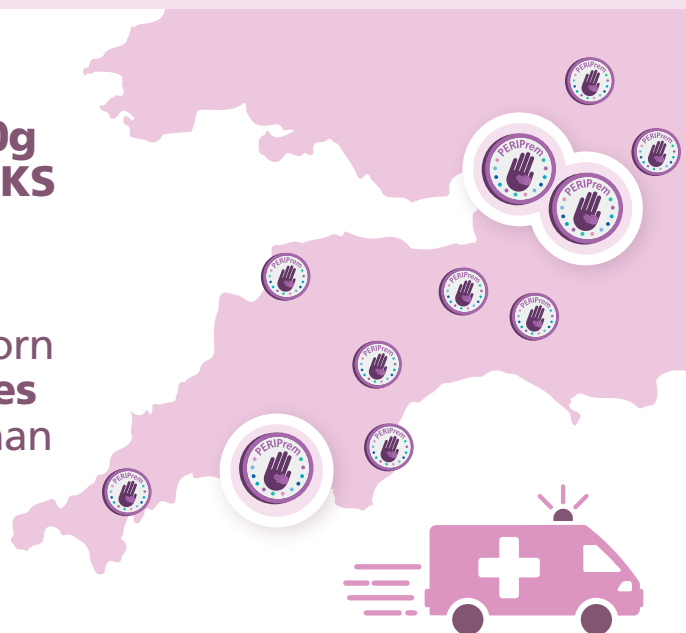

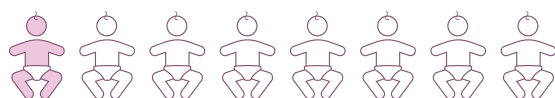

Did you know?

Babies below **27 WEEKS**, under **800g** and twins or multiples below **28 WEEKS** should be born in a maternity unit with a co-located NICU

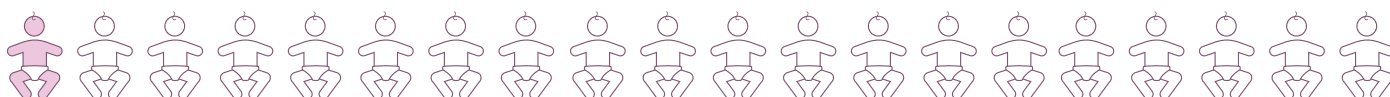

Extremely preterm babies (<28wks) born in a non NICU centre have a **2-3 times** higher risk of **Severe Brain Injury** than babies born in the optimal place

NNT 8*

Babies are **1.3 times** more likely to die if they are born in a non NICU centre even if they are then transferred

NNT 20*

Save a Life

Is the LNU/SCU concerned with pre-term birth and/or their QUIPP score is >5%?

Is the gestation <27 weeks (singleton) or <28 weeks (multiples)?

Accept transfer wherever possible!
