"The changes in medical innovation are likely to transform humanity by as much in the next 25 years as the internet has in the last 25 years…

So what might medicine look like when the NHS is 80? Well, the first thing is we may well not be going to doctors for a diagnosis. We might be going to computers instead, who will be looking at the 300,000 biomarkers in every single drop of blood, mashing that with big data information about everyone else's biomarkers…

…When we do go to a doctor, he or she may be comparing your medical record with our fully sequenced genome and giving us much more accurate predictive information…

We may be in a world where if we show any symptoms of a disease we consider that a sign of failure – because the name of the game will be to catch diseases when we are asymptomatic and we have a much better chance of being able to nip illness in the bud."

Jeremy Hunt,
NHS England's Health and Care Innovation Expo,
Manchester September 2017

Welcome

Dear Digital Leaders,

Our event today aims to introduce you to a wide range of innovations, products and services, which can potentially help accelerate your organisation's digital journey and that of your health and care community.

The day offers you the opportunity to connect with like-minded individuals, network with subject matter experts and attend workshops and learning events that have been designed to share insights into how communities are tackling common challenges.

There are breakout areas where you can meet with exhibitors and have one-to-one conversations, while our staff are on hand to support any questions you may have about the day.

Please explore and enjoy and keep in touch afterwards!

Best wishes

Janina Cross
Chief Digital Information Officer
West of England Academic Health Science Network

Gold sponsor

LumiraDx

Gold Sponsor of Digital Art of the Possible 2

We deliver accurate, actionable information quickly and simply, to enable effective, cost-efficient, diagnostic-led patient care.

Our unique integration of health and point of care diagnostic data, smart technology platform and supported self-care programmes delivers dynamic, digital healthcare solutions across whole populations.

At LumiraDx we are working as a technology partner in collaboration with the Health and Social Care Partnership and Greater Manchester Academic Health Science Network to support the DataWell Project with our technical platform solution.

MINDWAVE

Creating digital products and services that have a positive impact on people

USER-LED DESIGN

We work extensively with real people throughout the design process to develop empathy and challenge our own assumptions.

BUILT TO LAST

In the fast-paced sector of digital technology, we design flexible platforms that can continue to evolve once we step away.

WORK IN PARTNERSHIP

We pride ourselves on facilitating collaborative conversations and using prototyping to make, share and learn together.

System C & Graphnet Care Alliance

Advanced, integrated IT solutions for UK health and social care

System C & Graphnet Care Alliance is:

- ✓ No. 1 supplier in **shared care records**
- ✓ No. 1 supplier in **social care**
- ✓ No. 1 supplier in **electronic observation systems**
- ✓ No. 1 supplier in **child health**
- ✓ A leading provider of acute **electronic patient records** systems
- ✓ A significant player in **clinical care**, **maternity** and **business intelligence**

GLOBAL DIGITAL EXEMPLAR PARTNER
