Patient Safety Collaborative – Highlights from 2016/17

Organisations involved in our Patient Safety Collaborative have reached the following peaks...

Over **550,000** patients received a NEWScore within the ambulance service's electronic patient record

Up to

1,000,000 patients

benefitted

from our work in 2016/17

Over **70,000** patients received a NEWScore at triage into ED and enhanced care through the ED Safety Checklist

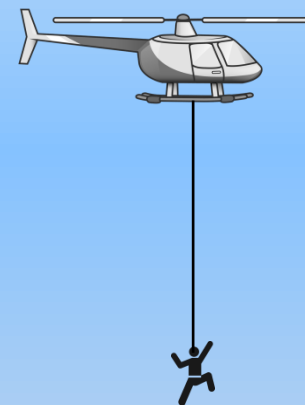

Over **4,000** referrals made from hospitals to community pharmacies using electronic transfer of discharge information

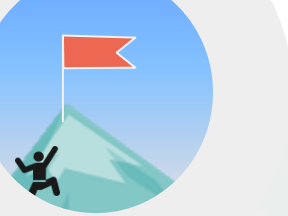

Over **3,000** staff trained in human factors

Over **200** users of the Life system

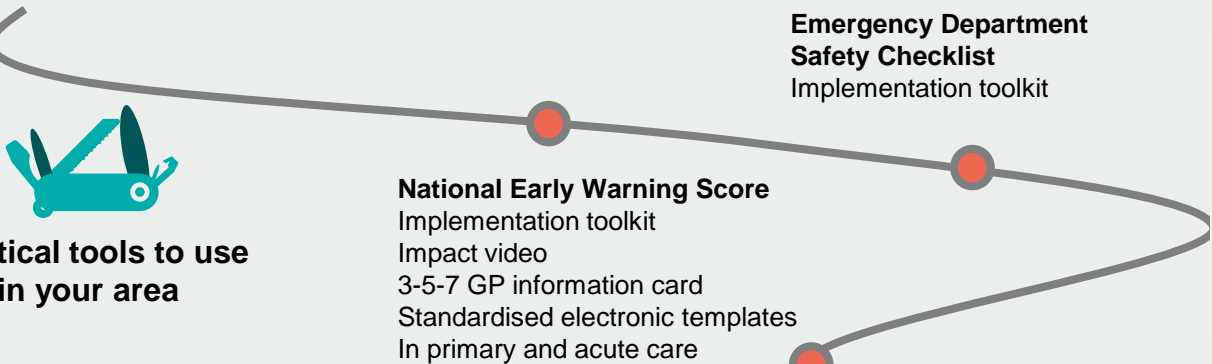

1,200 patients benefitted from the work of the Emergency Laparotomy Collaborative

333 primary care staff took part in safety culture survey

How we got there...

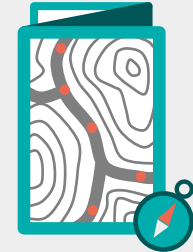

Practical tools to use in your area

National Early Warning Score
Implementation toolkit
Impact video
3-5-7 GP information card
Standardised electronic templates
In primary and acute care

Emergency Department Safety Checklist
Implementation toolkit

Resources and guides to show the way

Mortality reviews
Case studies
Training materials

Mental Health
MINDSet Quality Improvement Guide
Online resources

Life System
Training guides and supporting materials

Medicines Safety
Contributing to national toolkit

Human Factors in Community
Implementation toolkit
Training video
Training materials
Care home implementation pack

Collaborative events to learn & share

Emergency Laparotomy Collaborative
Online resources

Primary Care Collaborative
Online resource library
Practical guides for practices

Project Life Cycle
Templates for structured approach to project management
